

SFTP ENABLED SATELLITE DATA DOWNLOAD PROCEDURE

To meet NRSC security guidelines and user convenience, we have migrated our software from **FTP to SFTP** mode of downloading the data. The following are options for download

Option 1:

Users can also download the products from application using

<https://uops.nrsc.gov.in/ImgeosUops/FinalImgeosUops/FinalImgeosUopsSSL.html>

Clear the browser cache

1. First login with UOPS registered login and password.
2. Click the tab 'Product' and then, the tab 'FTP Download'.
3. Now, the following details have to be entered

SFTP host: <ftp1.nrsc.gov.in>

User Id: xxxxxx

Password: xxxxx

4. Click on 'Connect'
5. Product list will be displayed, after which individual products can be downloaded by clicking on it.

Option 2: On user/client side the downloads are to be done through software like **FileZilla, PSFTP, WinSCP** etc. on Windows environment. It is mandatory to specify application **port No 22**.

In case of any inconvenience for usage of SFTP please contact at following numbers
04023884436/ 08542225325/ 04023884431
